SUMMARY

QA Analyst who built an entire testing function from scratch as the sole QA professional at a software startup — establishing workflows, designing 500+ test cases, and shipping multiple releases with zero prior QA process in place. Now a Junior QA Analyst at Vértere Global Solutions in hands-on training for test automation with Playwright, Selenium and Cypress, plus API, performance and AI-assisted testing. Skilled in manual testing, defect tracking, and end-to-end validation across complex system modules. Brings a Magna Cum Laude foundation in Information Technology, sharp analytical instincts, and the adaptability to thrive in fast-moving environments.

SKILLS

Testing & QA: Manual Testing, Test Case Design & Execution, Test Planning, End-to-End (E2E) Testing, System Testing, Regression Testing, Smoke Testing, Exploratory Testing, UAT, Defect Tracking & Reporting, QA Documentation, SDLC, STLC, Agile Methodology

Test Automation (hands-on training): Playwright (TypeScript), Selenium (Java), Cypress (JavaScript), Page Object Model, Appium (currently learning)

API & Performance (hands-on training): Postman, Playwright API Testing, JMeter, k6

Tools: Jira, TestRail, GitLab, Git, GitHub, DBeaver, VS Code, Claude Code (agentic test automation, MCP), Google Workspace, Microsoft Office

Technical: HTML, CSS, JavaScript, TypeScript, Java, SQL, IT Support & Troubleshooting

Soft Skills: Analytical Thinking, Attention to Detail, Problem Solving, Communication, Collaboration, Adaptability

WORK EXPERIENCE

Junior Quality Assurance Analyst | *Vértere Global Solutions* Jun 2026 – Present

- Completing hands-on training in UI test automation with Playwright (TypeScript), Selenium (Java) and Cypress (JavaScript).
- Practising API testing with Postman and Playwright, and performance testing with JMeter and k6.
- Writing test plans, test cases and defect reports; tracking issues and tasks on GitLab Kanban boards.
- Using Claude Code for agentic test automation, including the Claude CLI with a GitLab MCP server.
- Writing SQL queries in DBeaver and using Git for version control.

Quality Assurance Analyst | *YouCode Technologies Corporation* Nov 2025 – Mar 2026

- Served as the sole QA analyst at a startup, building the entire testing function from zero — no prior QA process, documentation, or tooling existed.
- Designed, documented, and executed 500+ test cases across multiple system modules, covering end-to-end, regression, system, exploratory, and smoke testing.
- Caught and reported critical defects before production release, directly reducing the risk of customer-facing bugs across multiple release cycles.
- Managed the full defect lifecycle — from identification and detailed bug reporting to developer collaboration and verified resolution.
- Built internal QA documentation and system references from scratch, enabling faster onboarding and consistent testing standards across the team.
- Validated application functionality, usability, and edge cases across every release, ensuring product stability in a high-velocity startup environment.

IT Training Assistant Intern | *Excellence and Competency Training Center, Inc. (EXACT)* Feb 2025 – May 2025

- Provided technical support and troubleshooting for instructors and training systems, keeping daily operations running without disruption.
- Diagnosed and resolved hardware and software issues across computers, peripherals, and specialized training simulators (ERS, TRANSAS, GMDSS).
- Assisted with documentation and user inquiries, supporting smooth day-to-day training operations.

PROJECTS

QA Portfolio: Tested Like a Product (imbrayl.github.io) Oct 2026

- Built a portfolio site that switches between Playwright, Selenium and Cypress syntax, with a locator inspect mode for every element.
- Covered it with a Playwright + TypeScript suite using the Page Object Model, axe accessibility scans and locator verification, run on desktop and mobile in GitHub Actions; the site only deploys when all tests pass.

iSukat: Shoe Size Measurement via Image Recognition Aug 2024 – Nov 2024

- Developed front-end components (HTML, CSS, JavaScript) for a web system that measures foot size and recommends shoe sizes using image recognition.
- Created and executed manual test cases to validate UI behavior and system responses prior to integration.
- Research paper presented at ICICyTA 2024 and published in IEEE Xplore.

SeekSmart: Lost and Found Management System May 2024 – Aug 2024

- Contributed to development of a web-based lost-and-found system with image recognition capabilities.
- Designed and executed manual test cases to verify system functionality and document feature outcomes.

EDUCATION

Bachelor of Science in Information Technology — *Magna Cum Laude* 2021 – 2025

Pamantasan ng Lungsod ng Maynila

CERTIFICATIONS & TRAINING

Certified Tester Foundation Level (CTFL) v4.0 Prep — Codecademy

- Studied test case design, defect reporting, QA documentation, and structured testing methodologies.

Agile Principles and Methodologies — Codecademy

- Learned Scrum framework, sprint cycles, and iterative development practices applied to QA workflows.

Unit Test Development with Generative AI — Codecademy

- Explored AI-assisted approaches to generating Python unit tests and applying modern testing best practices.
